

Carpet Re-Rolling Machine

Model - CRR

The Carpet Re-Rolling Machine **CRR** is used to reverse the carpet roll ends, as is required before being passed through the coating line. This machine ensures straight and tightly wound rolls and can be used for pile in and pile out unwinding and winding. This machine can be customized to the needs of the customer.

Features & Options

- PLC controlled synchronizing system
- Forward and short reverse run
- Positive unwinder with edge guider
- End detector
- Automatic input roll feeding system
- Automatic threading of fabric
- Slitting system
- Cross cutter
- Electronic counter meter
- Face In Face Out winding
- Selvage guider for straight rolling
- Variable roll compactness
- Automatic weighing
- Online stretch wrapping of rolls
- Automatic roll doffing
